

Layle Kip Smith to head Aluminum Association

The Aluminum Association announced recently a number of changes to its Board of Directors, including a new Chairman, Vice Chairman and members of the Board Class of 2016. In addition, the Association added two new member companies, AMCOR and Superior Flux and Manufacturing, bringing total membership to 97 companies, consisting of 49 producer and 48 associate members. The announcements were made during the Aluminum Association's 80th anniversary fall meeting at Nemacon Woodlands Resort in Pennsylvania, where the industry celebrated aluminum as "the metal of modern life."

Former Aluminum Association Vice Chairman Layle "Kip" Smith, President of Noranda Aluminum, was elevated to Chairman of the Association, replacing Pat Franc, President of Tri-Arrows

Aluminum. Additionally, Garney B. Scott, President of Scepter, Inc., was named Vice Chairman of the Association and Chairman of the Association's Executive Committee, which provides strategic vision and guidance overseeing all Association activities. Both Smith and Scott will serve for two-year terms. The Board also added three new members to the Board Class of 2016:

- Marco Palmieri, President of Novelis North America
- Kevin Person, CEO of Wagstaff, Inc.
- David Hazelett, President of

Hazelett Strip-Casting

Palmieri will also serve on the Association's Executive Committee. "I'm very pleased with these additions to the Board, which will help us tell the aluminum industry's great story on sustainability and innovation," said Association Chairman Kip Smith. "As the industry continues to come back from the recession, I'm pleased to have a diverse set of voices to rely upon."

The Association also announced the addition of two new member companies during the meeting. American Metal Chemical Corporation "AMCOR", of Medina, OH and Superior Flux and Manufacturing of Cleveland, OH, both of which provide goods and services to the aluminum industry, will join as Associate members. ○○○

INTERNATIONAL CONFERENCES & EXHIBITION ON ALUMINIUM ALEXASIA 2013

17-19 (Thu-Sat) October 2013 | Nehru Centre, Mumbai, India

It's time for one of the most prestigious events for extrusion titled "ALEXASIA 2013" by Aluminium Extruders' Council (ALEX) for three day International event.

India has been a reliable sourcing hub for many years and now many international companies are looking at India for joint ventures, as well as to establish their own manufacturing units. Auto and Solar industries, as well as Metro Rail Systems are on an exponential growth track and light weighting in these sectors is leading to enhanced use of Aluminium. The Building and Construction are no exception either.

In view of above, there are eight concurrent events, including an Exhibition, Technical conferences on "Aluminium Extrusion Technology" and "Aluminium Gravity Die Casting

Technology". The events such as Buyer Seller Day, CEO Conclave, Hi-tek Cafe, Business Meets and Plenary Sessions on Aluminium Alloy Manufacturing Technology and Die Technology further add value to the event, provide multiple networking opportunities and also attract concerned visitors to the exhibition.

This year around one thousand plus visitors is being expected for the

exhibition where around 50 stalls would be installed by various companies.

During the conference presentation paper would be presented on various aspects likes welding technology, latest technology in extrusion billets handling, surface coating technology, Induction heating of billets, waste to wealth briquetting of aluminium etc.
